- Noisy Zap
- Complicated to Clean
- Outdoor Use Only
- Unpleasant Burning Smell

START TRAPPING

- Whisper Quiet
- Twist Open and Clean with Brush
- Effective Indoors and Outdoors
- Odorless

close

SIZE MATTERS

With over 1 full acre of coverage, the DT2000XL is designed for heavy duty insect control. Enjoy the outdoors more often with the DT2000XL.

No expensive attractant or propane necessary

Easy to install and whisper-quiet

Smokeless – pesticide and odor free

Indoor and outdoor use

Operate 24 hours a day, 7 days a week

Provides over 1 acre coverage for pest control

Durable, all weather construction

1 year warranty

Standard colors come in Black and Hunter

Green. Custom colors are also available.

Minimum quantities required.

A BIGGER DESIGN FOR A BIGGER CATCH

Just like the other Dynatrap models, the Dynatrap DT2000XL attracts and captures all flying insects, including moths, flies, gnats and mosquitoes. However, the DT2000XL is twice as big as the DT1000 and DT1100, has brighter bulbs, and a more powerful fan. There is also a protective screen between the bulbs and the fan, and a damper that closes when the trap is turned off to prevent the insects from escaping.

The Dynatrap is equally suitable for large areas which require heavy duty insect prevention and for small yards patios. For heavy duty insect control, nothing is more powerful and effective than the DT2000XL.

Size Comparison

TECHNICAL INFORMATION

Two UV light bulbs (6 watts ea.) -
approx. 4,000 hours (included)
Cleaning brush
7 ft. cord - 115 VAC (plugs into AC)
Range: 1 acre
Size: 22" H x 13" Diam.
Weight: (9 lbs.)
